

NEWS RELEASE

Announcement on the Expansion of PT FANS INDUSTRY INDONESIA

F&A Nonwovens Co., Ltd. (hereinafter referred to as “FANS”) has positioned overseas business expansion as one of the key strategies in its medium-term management plan. We are pleased to announce that we have expanded the nonwoven fabric production facilities at PT FANS INDUSTRY INDONESIA (hereinafter referred to as “FANS Indonesia”), one of our overseas production bases, as outlined below.

1. Overview

FANS develops, manufactures, and sells products and equipment for a wide range of fields, including automotive and environmental sectors. Our policy is to provide new customer value to the global market through continuous product and technology development that breaks away from conventional concepts.

Since its establishment in 2013, FANS Indonesia has mainly produced nonwoven fabrics for major clients in OA (Office Automation) applications. However, due to limitations in production capacity, we have been unable to fully meet client requests. With future demand expected to increase, we have added a second production line with higher productivity to the existing first line.

The newly installed nonwoven fabric production equipment is expected to improve productivity by 25% compared to the existing first line. At the same time, we have upgraded the facility to be more environmentally friendly by introducing LED lighting and strengthening dust collection systems.

2. Investment Details

- Location: PT FANS INDUSTRY INDONESIA (Indonesia)
- Equipment Installed: Nonwoven fabric production equipment
- Maximum Production Capacity: Approx. 2,500 tons/year (including the existing line)
- Investment Amount: Approx. 900 million yen

3. Start of Operation

March 2025

【PT FANS INDUSTRY INDONESIA】

Address : Jl.jababeka V Blok I/3 Kawasan Industri Jababeka

Desa Harja Mekar Kec.Cikarang Utara Kab. Bekasi-17530 Indonesia
